

The following table is referred to on page 20 of the EPA Annual Report 2011-12.

The table **Waste Composition and Recycling Statistics 2006/7 to 2010/11** outlines the waste composition and recycling statistics for Tasmania over a five year period.

The recovery rate in Tasmania is currently estimated to be around 26 percent and this is based on the best available data at the time of report preparation.

Waste Composition and Recycling Statistics 2006/7 to 2010/11

Waste Generation - Tonnes

Year	Landfilled	Recycling	Composted	Generated
2006/07	445,794	47,450	27,587	520,831
2007/08	419,800	51,880	32,692	504,372
2008/09	398,523	51,493	25,446	475,462
2009/10	386,803	96,740	40,411	523,954
2010/11	445,553	112,945	43,931	602,429

Waste Breakdown by Sector %

Year	Municipal	C & I	C & D	Total
2006/07	64.35%	32.57%	3.08%	100%
2007/08	56.00%	38.50%	5.50%	100%
2008/09	40.51%	53.02%	6.47%	100%
2009/10	41.10%	51.76%	7.13%	100%
2010/11	38.47%	52.82%	8.70%	100%

Waste Breakdown by Sector (Actual Tonnage)

Year	Municipal	C & I	C & D	Total
2006/07	286,868	145,195	13,730	445,794
2007/08	235,088	161,623	23,089	419,800
2008/09	159,370	208,558	25,446	393,374
2009/10	158,993	200,223	27,586	386,802
2010/11	171,412	235,356	38,785	445,553

Recovered

Year	%
2006/07	14.41%
2007/08	16.77%
2008/09	16.18%
2009/10	26.18%
2010/11	26.04%
